

ABSTRACT OF THE DISCLOSURE

A flourescent lamp assembly including a reflector having a cutout, a flourescent lamp and a lampholder. The lampholder includes a base end positioned within the cutout, a socket receiving the flourescent lamp and a first plug-in connector of a first gender for receiving electrical power. The first plug-in connector is positioned at the base end and generally opposite from the socket. The first plug-in connector includes a line conductor and a neutral conductor.
